

Federated EGA (FEGA) pricing information

GENERAL INFORMATION

Federated European Genome-phenome Archive (FEGA) is a service for storing and publishing personally identifiable genetic and phenotypic data given with consent for research but not for full public dissemination. The use of the service **always requires a separate contract between the submitting organisation and CSC.**

The service includes trusted data storage for the active copy of the data, metadata submission and storage, publication of the public metadata at EGA discovery webpage, permanent identifier assignment (EGA accession number) and a data access authorization service, which are covered by [the free-of-charge use](#). In addition, the service requires storing a separate backup copy of the submitted data. **The service doesn't create a backup copy by default to be stored at CSC**, as the backup service at CSC is not free-of-charge*. Submitting organisation must always agree separately on the storage of the backup copy with CSC.

Reuse of the data stored in the service is available for [free-of-charge use](#) for authorized users affiliated with a Finnish higher education institution. The original data owner always controls the data access, and the data will be available only on the secure SD Desktop computing environment for the authorized users.

**The backup service is not included in the agreement with the Ministry of Education and Culture and thus is not covered by the free-of-charge use cases.*

PRICE LIST FOR STORING THE BACK UP COPY OF THE DATA AT CSC

Prices are reviewed periodically.

<i>Amount of data in the storage service</i>	<i>Euros/year, excluding VAT</i>
1 TB	200
10 TB	1 800
