

Federated EGA (FEGA) pricing information

Federated European Genome-phenome Archive (FEGA) is a service for storing and publishing personally identifiable genetic and phenotypic data given with consent for research but not for full public dissemination. The use of the service is not covered by the free-of-charge use cases for users affiliated with a Finnish higher education institution, and it always requires a separate contract between the submitting organisation and CSC.

The service provides an active copy of the submitted data ready for research use, and a separate backup copy of the data is being maintained at a separate physical location. The price of the service consists of the costs of the backup copy, as the backup service is not included in the agreement with the Ministry of Education and Culture.

Reuse of the data stored in the service is available for free-of-charge use for users affiliated with a Finnish higher education institution.

Price list for 2024–2025:

<i>Amount of data in the storage service</i>	<i>Euros/year, excluding VAT</i>
1 TB	200
10 TB	1 800
100 TB	16 000
1 000 TB	150 000
